DETAILED ACTION

Rejections Repeated

1. The 35 U.S.C. 102(b) rejection of claims 1-3,5-9 anticipated by Kubota has been repeated as previously made in office action 10/14/09.

As to new limitation, "wherein the lead terminal is a laminated material having at least a first conductive layer of a first conductivity and a second conductive layer of a second conductivity", Kubota discloses that layer 14 is made of Nickel and layer 2a is made of aluminum.

2. The 35 U.S.C. 103(a) rejection of claim 4 unpatentable over Kubota has been repeated as previously made in office action 10/14/09.

Response to Arguments

3. Applicant's arguments filed 1/14/10 have been fully considered but they are not persuasive.

In response to applicant's argument that Kubota fails to disclose "wherein the lead terminal is a laminated material having at least a first conductive layer of a first conductivity and a second conductive layer of a second conductivity", Kubota discloses that layer 14 is made of Nickel and layer 2a is made of aluminum.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
